# WELCOME TO PTS SYNDICATE

When it comes to training, simulation, and the ultimate experience, there's PTS and then there's everyone else.

With RDT&E (Research, Development, Test & Evaluation) Teams in both USA and Asia and using the best materials and manufacturing processes, PTS Syndicate is committed to bringing the highest quality and most innovative products onto the market to meet and exceed the exacting standards of the most discriminating end user. PTS is also a prolific exclusive licensee of the latest and greatest products in the tactical market. We have an excellent reputation as a trusted license partner that works closely with our licensors to extend awareness of their brands into a new market space.

BattleComp® is among the best and most popular rifle muzzle devices available in today's rifle market. Whereas a normal flash hider muzzle device reduces flash signature only, muzzle brakes control rifle recoil extremely well thus allowing for highly controllable rapid or full-auto fire. However, muzzle brakes achieve this at the expense of reduced flash reduction and very highly concussive shock wave around the muzzle device versus normal flash hiders which are typically detrimental for lowlight/night combat shooting as well as close proximity shooting with teammates and in confined spaces. The BattleComp® blends the functions of both muzzle brakes and flash hiders by providing the best balance of recoil reduction with only a slight compromise in flash reduction and concussion to create the best battle ready muzzle device on the market.

Centurion Arms was founded and owned by Monty LeClair, a recently retired decorated combat veteran with 20 years of active duty special operations service as a Navy SEAL. Prior to his retirement, Monty was the Chief Petty Officer at the famed Navy SEAL Sniper School. During his service, Monty served in several SEAL teams on both the East and West Coasts. Monty also served in NAVSPECWARCOM performing weapons and equipment DT&E (Operational Testing and Evaluation) where he played a significant role as a subject matter expert in the Mk16/Mk17 SCAR development program. He had also performed a stint in TRADET (Training Detachment) as an advanced sniper instructor during which time he famously built one of fellow SEAL sniper Chris Kyle's (of "American Sniper" fame) operationally used and favorite custom Mk13 sniper rifle. Initially known for custom gun builds and for offering superior quality precision AR barrels, Centurion Arms makes a full range of some of the most innovative and sought after AR rails and AR accessories on the market.

GoGun® USA designs and manufactures an array of components for custom firearms for both the tactical and competitive shooter. Their pioneering and innovative Gas Pedal grip has altered the way handguns are facilitated. The SuperComp™ Talon Brake and SuperComp™ No Talon Brake are considered some of the best rifle muzzle brakes on the market.

Griffin was founded by two brothers, combat vets from OIF. Both are Army Sniper qualified and have deployed numerous times overseas in military and other government capacities. Their time in government service left them both with hearing loss, driving them to manufacture silencers to protect the hearing of fellow shooters. Their knowledge in manufacturing, design, and understanding of silencer applications allows them to create industry leading silencers and firearm solutions.

Kinetic™ Development Group designs and manufactures innovative small-arms accessories and complete systems utilizing the latest materials and fabrication technologies. Kinetic™ starts by focusing on what they saw as deficits with the quality rifles and carbines on the market, at least those perceived by the serious end user and warfighter and creates innovative and occasionally revolutionary new capability enhancing products. Their first project, the MREX, or Modular Receiver Extension, in addition to several other Kinetic developed component products, transforms the SCAR from an awkward carbine to a comfortable open architecture carbine configurable with any number of accessories.

Mega Machine Shop which was established in 1984 as an aerospace grade machine shop serving the aerospace, fabrication and heavy-equipment industries. Seeing a void in the firearms industry for guns they knew they were uniquely capable of producing with their advanced manufacturing capabilities, Mega Arms was formed and quickly became known their design, engineering, and production of precision AR-15 components and distinctive complete rifles that remain unsurpassed in finish and performance quality in the rifle production industry. In 2017, Mega Arms merged with ZEV Technologies, the world's premier designer and manufacturer of premium after-market Glock pistol products and accessories. The two companies will continue under the ZEV brand name and will leverage each other's strengths to expand their product offerings including ZEV branded premium AR15's and a whole host of other new products

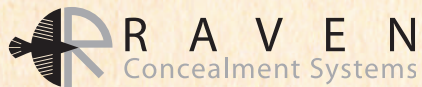

MTEK is comprised of a group highly committed individuals that are utilizing their military, design, and technology experience to seek to provide cutting edge solutions for individual soldier gear and protective equipment. Their main product is the FLUX helmet and features the latest technologies in comfort and lightweight head protection. It is the result of a multi-year design and development effort to create an advanced, modular helmet system. The word FLUX is an acronym for Future, Lightweight, Undercut, eXpandable and is derived from latin fluxus, meaning "flow". Every aspect of the FLUX has a very specific and deliberate purpose while maintaining design continuity- everything "flowing" together. The FLUX is available in both ballistic and non-ballistic versions with additional add-on accessories.

Radian Weapons is the industry's leading innovator of ambidextrous weapon control components for the M4 platform. What sets Radian above most other companies is their ability to merge revolutionary new functionalities to weapon systems with some of the best design aesthetics in the industry without compromising either form or function. Radian is best known for their industry-leading Raptor ambidextrous M4 charging handle, their patented A-DAC (Ambidextrous Dual Action Catch) in their precision billet AX556 lower receiver, and the revolutionary adjustable 45/90 degree modular ambidextrous safety called the Talon. All these radically innovative components are also synthesized into their fully ambidextrous Radian One, a precision carbine platform that's capable of sub-MDA accuracy performance and combat condition reliability.

Rainier Arms was founded in 2005 by shooting enthusiasts for shooting enthusiasts. Specializing in high end AR-15s/M16s, parts & accessories, their motto is "If we won't use it, we won't sell it." Even though they are one of the largest retailers in the market, they aggressively maintain their pulse on the latest market trends and are often the first to bring innovative new weapon accessory products to market.

Raven Concealment is the leading maker of kydex holsters for low profile and conceal carry holsters and accessories on the market. With a full suite of engineering, design, and advanced manufacturing capabilities, they continue to develop and produce the most innovative, modular, and concealable, low profile weapon carrying systems on the market.

"Innovative, Adaptive, Decisive." Unity Tactical designs and provides innovative warfighter products that blend form, function, utility, and technological sophistication into cutting edge solutions to common problems. Their line of highly unique and modular products include the innovative ATOM™ Modular Glock slide, the FUSION™ modular accessory mounting system, and the KNUCKL™ modular helmet mounting system.

US PALM® was dedicated to developing and producing the world's finest firearms enhancements and accessories. One of the things that made US PALM® different was that they were constantly working to refine their product lines. While many of their designs are revolutionary, they believed in maintaining an evolutionary product design mind-set to ensure that their products met the reliability and durability standards required by the warfighter for critical situations. In 2017, US PALM shut its doors. However, their legacy continues in the PTS airsoft replicas.

ZEV Technologies, Inc. is one of the leading companies in innovating and producing the highest quality weapon accessories and parts. ZEV was started with a focus on competitive shooters, pioneering the first drop-in replacement triggers for GLOCK®. To this day, ZEV's triggers are the gold standard for competitors worldwide. From its start with triggers, ZEV built its business with the philosophy that any part it made had to be the best product of its type available on the market. Over time, Zev's customer base expanded from competitive shooters to elite military and law enforcement and ultimately, into leading gun stores and ranges for every shooter.

As a result, ZEV's rapid growth is recognized as one of Inc. 5000's fastest growing companies. Today ZEV provides the most complete set of replacement parts for GLOCK® for every type of shooter to be able to create the firearm that matches their lifestyle and shooting goals. In 2017 Zev merged with Mega Arms, LLC, a top tier manufacturer of AR rifles and components, and will bring a line of AR and rifle products to the market in the near future.

Battle Arms Development, Inc. (B.A.D. Inc.) is a design, research, and development firm incorporated in 2009 with a focus on small arms design including firearm components, tools, gauges, accessories, and complete weapon systems. B.A.D. Inc. officially launched on Independence Day, July 4th, 2009. An American and minority owned small business, all B.A.D. Inc. products are 100% made in the U.S.A. and held to the highest manufacturing standards to exceed the expectations of the most demanding end users. With multiple patents granted and many patent pending with the U.S. Patent Office, B.A.D. Inc. engineers superlative performance advantage, added value, ingenuity, and attention to detail into every product it designs and manufactures. Its unique, out of the box thinking, and dedication to customer service have earned an enviable reputation among its peers and customers.

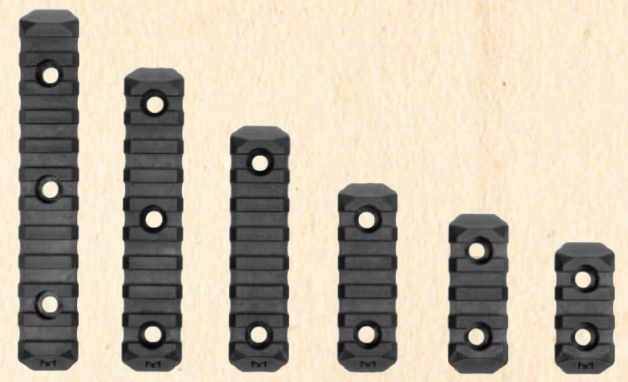

Fortis's focus is to provide "Operator" needed strength with exceptional design and aesthetics at an affordable price. Every product designed by FMI™ undergoes a strenuous testing and evaluation period with a diverse group of select professionals, resolving all issues before a product is considered ready for production. It is this philosophy that ensures each product will meet or exceed the heavy demands of the professionals who use them.

## PTS MEGA ARMS MML AR-15 ERG

Proprietary Mega MML platform interfaces the 14 inch M-LOK compatible aluminum rail with the billet style aluminum receiver in a manner that gives the entire assembly virtually the strength and rigidity of a monolithic upper

- ▶ Standard equipment also includes our proprietary design PTS Enhanced Polymer Grip, Enhanced BUIS, Enhanced Polymer Magazine and Enhanced Polymer Stock

PRODUCT CODE

R0004680307

## PTS PDR-D

- ▶ The PTS PDR is a conceptual prototype envisioned as an ultra-compact, rifle-caliber personal defense weapon
- ▶ Designed to fill the unique role between pistol and rifle, by combining the stealth of the handgun with heavy firepower while greatly reducing any logistical burden
- ▶ Features a full sized pistol grip, removable forward grip, and extended tail section

## PTS PERFORMANCE ARM SLEEVES

- ▶ Designed to protect exposed skin from the sun's harmful ultraviolet rays throughout the Anti-UV fabric
- ▶ Tailored to be a comfortable stretch fit, made from lightweight, moisture-wicking fabric
- ▶ Constructed from high-performance polyester fabric. Quickly and efficiently wicks sweat away from the body and moves it to the fabric surface, where it evaporates, keeping users dry and comfortable even during the most strenuous conditions
- ▶ Anti-UV fabric construction provides a minimum of UPF+30 ultraviolet protection thus preventing sunburn and other sun related illnesses

PRODUCT CODE	PT820830300
--------------	-------------

## PTS MTEK FLUX HELMET

- ▶ Features the latest technologies in comfort and lightweight head protection.
- ▶ The word 'FLUX' is an acronym for Future, Lightweight, Undercut, eXpandable and is derived from latin fluxus, meaning 'flow'.
- ▶ Every aspect of the FLUX has a very specific and deliberate purpose while maintaining design continuity everything 'flowing' together.

## PTS SAPI DUMMY PLATE

- ▶ An ideal alternative to your heavier and harder standard dummy plate
- ▶ Designed solely for Airsoft and Milsim purposes, the plate has been carefully constructed to ensure flexibility and lightness - enabling you to perform any actions or maneuvers with comfort and fleet of foot
- ▶ Materials have been tested to be abrasion resistant and will not lose any color from washing or drying
- ▶ Elasticity in these materials, allowing it to return to its original form from any force applied
- ▶ Each size accurately replicates the dimensions of the corresponding real SAPI/ESAPI plate
